Sage Summit 2011 Fixed Asset Management Workshops to be Hosted by Paragon Systems

Sage authorized consultants from Paragon will team with current Sage FAS customers in three breakout sessions to discuss best practices in fixed asset accounting and management at the Sage Summit 2011 conference.

Chicago, IL – July 5, 2011 – Paragon Systems (www.FixedAssetExperts.com), a nationwide provider of Sage FAS Fixed Asset Management software, has announced participation in the Sage Summit 2011 conference as an exhibitor as well as a workshop host. In addition to their display in Booth 733, Paragon will also present three breakout sessions discussing the advantages of fixed asset accounting and management with Sage FAS Software. The conference will be held at the Gaylord National Hotel and Conference Center in Washington, DC. July 10 - 15, 2011. Sage Summit 2011 represents a new format that combines both Sage Authorized Business Partners and Sage customers at the same event.

During the three classroom-style breakout sessions, Paragon's staff of fixed asset management experts will be joined by key customers that will share their experiences using [Sage FAS Fixed Assets software](#), discuss fixed asset inventory strategies, and answer questions about best practices for fixed asset accounting.

Angie Bolton Lyons, Senior Fixed Asset Consultant and Sage FAS expert at Paragon, finds more than one reason to be excited about [Sage Summit 2011](#). "We're really excited about the opportunity to collaborate alongside some of our key customers in presenting the workshops. Not only will you hear from fixed asset management experts that know Sage FAS inside and out, but attendees will have an opportunity to hear real world stories from customers that use fixed asset software and best practices to benefit their bottom line."

Bolton adds that Paragon's experience managing fixed asset inventories and implementing Sage FAS software can offer opportunities for all Sage Summit attendees. "Fixed asset accounting is a different animal and requires specialized experience. In fact, much of our success comes by way of partnering with other Sage resellers that don't have the time or resources to offer fixed asset management solutions to their clients – it's tough enough to maintain expertise in their core ERP, CRM, and HRMS solutions. So partnering with Paragon expands the breadth of business solutions they can offer to their customers without expanding payroll and overhead along with it."

To visit with the fixed asset management experts from Paragon Systems during Sage Summit 2011, stop by Booth 733 or check the conference agenda at www.sagesummit.com to register for a fixed asset management breakout session. Early registration for breakout sessions is recommended as seating is limited.

- **Basics of Conducting a Fixed Asset Inventory** — Program C-FAS05, Monday, July 11, 8:30-10:00am
- **Roundtable: Fixed Asset Inventories** — Program C-FAS15, Monday, July 11, 1:30-2:30pm
- **How to Cover Your Assets: FAS Disaster Readiness and Recovery** – Program C- FAS11, Friday, July 15, 10:15-11:45am – A hands-on session featuring a Paragon Systems client discussing how their business used FAS for disaster recovery.

About Paragon Systems

Paragon Systems, a division of Paragon International, Inc. located in Schaumburg IL, is an authorized business partner of Sage Software and certified in the Asset Accounting and Inventory applications. Paragon has been working with Sage Software providing fixed asset management solutions for over 20 years. They provide a complete Goldstrike solution, including inventory services and bar-coding hardware, data conversion and integration, cost reconciliation and appraisal services, and software customization and training. As a member of the FAS VAR council, they regularly contribute to the development and enhancement of the fixed asset product line, specializing in FAS implementation and integration of inventory services.

Paragon Valuation Group, a Division of Paragon International, Inc. provides valuation services including appraisals of real estate and equipment, property tax reduction programs, fixed asset management activities, maximization of federal tax benefits through Section 1245/1250 cost segregation studies, and allocation of purchase price for recently completed transactions.
