A member of FAS Nonprofit Suite™ — an integrated asset management solution.

For maximum performance and scalability in fixed asset management, FAS Nonprofit Asset Inventory for SQL Server provides asset inventory tracking and reconciliation capabilities for nonprofit organizations needing help with inventory management. Using state-of-the-art bar code technology, including Windows® CE and Palm OS® devices, FAS Nonprofit Asset Inventory for SQL Server creates and tracks multiple physical inventories of assets quickly and efficiently—so you achieve tighter control over your fixed assets.

## Gain greater speed and scalability for tracking assets.

- Seamless integration with FAS Nonprofit Asset Accounting™ for SQL Server
- Enhanced history tracking captures critical “before and after” asset conditions
- Faster processing times with SQL Server and Windows Server infrastructures
- Scalability with client/server architecture and support for multiple databases
- Conduct multiple inventories concurrently at various sites and reconcile data at one central location
- Supports both types of inventories—*Baseline* to add new assets, and *Dynamic* to verify information on existing assets
- “Import/Export Helper” allows you to import data from, or export data to, the most popular spreadsheet and database applications
