- Installation & Implementation
- Fixed Asset Data Conversions
- Custom Report Writing Services
- FAS Product Upgrades
- Fixed Asset Inventory Services

A member of FAS Suite®—an integrated asset management solution.

For maximum performance and scalability in fixed asset management, FAS Asset Inventory for SQL Server provides automated asset inventory tracking and reconciliation capabilities for SQL Server based computing environments. Using state-of-the-art bar code technology, including Windows® CE and Palm OS® devices, FAS Asset Inventory for SQL Server creates and tracks multiple physical inventories of assets quickly and efficiently—so you achieve tighter control of your fixed assets.

Gain greater speed and scalability for tracking assets.

- Seamless integration with FAS Asset Accounting™ for SQL Server
- Enhanced history tracking allows the capture of critical before and after asset events
- Faster processing times with the SQL Server infrastructure
- Scalability with client/server architecture and support for multiple databases
- Conduct multiple inventories concurrently at various sites and reconcile data at one central location
- Supports both types of inventories—*Baseline* to add new assets, and *Dynamic* to verify any data on existing assets

(over, please...)

FAS Asset Inventory™ for SQL Server

Hand-held devices make
conducting inventories easy.

- Track assets at remote locations, where inventories can be conducted by exchanging data via email attachments
- “Import/Export Helper” allows you to import data from, or export data to, the most popular spreadsheets and database applications
- Windows CE and Palm OS devices make it easy to perform inventories with less expensive bar code readers containing more memory
- On-screen “Virtual Reader” lets you perform a test inventory—and even add assets—before you invest in hardware
- Fifty-one fully customizable fields with the ability to control data entry and notes, plus images to describe each asset record
- “Secondary Tag” field allows you to summarize assets by room location while conducting inventory
- “Check In/Check Out” feature with a “Check Out History” constantly monitors assets on the move
- Fixed asset inventory labels available for purchase online at www.bestsoftware.com/FASLabels

The FAS™ family includes:
